SUMMARY

Data product and AI operations leader. Nine years at athenahealth in enterprise platform support; current title **Platform Data Solutions Senior Manager — Internal AI & Data Product Builder**. Architecting AI-first operations: federated operating models, builder communities, governed analytics platforms, agentic development workflows, and local-first analytics delivery. Personal velocity: **4,435 GitHub contributions in the last year** shipping a public production multi-agent system at robotics.press (1.4K companies, 40.7K signals, 31.7K infrastructure sites scored).

EXPERIENCE

athenahealth · Belfast, ME (Hybrid)

Mar 2017 – present (9 yrs 3 mos)

Platform Data Solutions Senior Manager — Internal AI & Data Product Builder

Aug 2024 – present

- Architected a **federated AI operating model** — moved operational teams from isolated experimentation to repeatable AI-enabled execution. Builder communities supporting **dozens of active AI builders** + portfolio of dozens of operational automations across Support, Onboarding, Enablement, Data Ops.
- Built a **governed analytics platform** — shared SQL models, semantic tests, validation gates, and consumer-facing data contracts on top of an enterprise warehouse-backed analytics stack (Snowflake).
- Designed an **agent-assisted development operating model**: task packets, backlog control, scoped worktrees, staged review, validation checks, evaluation artifacts, and durable closeout memory.
- Built **local-first analytics delivery** — warehouse → Parquet → DuckDB packaging with manifests, validation gates, provenance, and browser-ready stakeholder surfaces.

Manager, Emerging Products Services

Jul 2020 – Dec 2024

- Managed Platform Support across Pop Health, HPDE, Moment of Care, an enterprise data product line, and ACO products. Grew zone to **~22 people supporting ~\$160M in business** end to end; cross-functional with Product and Engineering.
- Led data-product continuity at scale: MFA rollout (tens of thousands of accounts), global Tier 1 transition (**more than doubled partner resolution share**), Snowflake account consolidation (**six-figure annual savings**).

Senior Emerging Product Services Associate

Mar 2017 – Jul 2020

- Built Population Health support from greenfield as Pop Health was integrated into athenaOne — case ops, knowledge base, and operational infrastructure for a complex data product with no existing support model.
- Operationalized an enterprise data product (raw production warehouse → productized client offering): built support, ops, and integration that turned an analytics/IT artifact into a real client product.

robotics.press · Creator / Operator · public production multi-agent system

2024 – present

- Intelligence platform on robotics in security/defense/infrastructure. 1.4K companies, 2.8K articles, 40.7K signals, 31.7K sites scored against drone exposure (CIDE geospatial map), 4,174 attack events indexed.
- 12+ Python repos: card-composer agent (replaces 36 templates), shared tool registry, llm_traces observability, mixed-model routing (Claude + Haiku), SEC EDGAR/GDELT/DVIDS/OpenAlex/YouTube listener pattern, Astro publishing, systemd services.

Q5 Labs · Founder / Operator · niche sports nutrition brand

Jan 2012 – Jun 2016

- Bootstrapped \$0 → \$20K+/month with no marketing budget. Designed product line, packaging, and brand; ran content + influencer marketing. **Successful exit in 2016.**

BJJ Weekly · Co-Founder / Publisher · niche media venture

May 2010 – Jan 2012

- Newsletter 0 → 19,764 subscribers at 74% open rate; YouTube channel to 7M+ views. Largest blog in the niche within 18 months.

Thomas Consulting / Edit Systems · Independent IT consulting (Maine)

2003 – 2016

- Managed services for dental and legal practices (2009–2016). PM/design lead on statewide K-12 student-assessment database deployed to Maine's career & technical schools (2003–2005).

Earlier: Mid-Coast School of Technology — Tech Coordinator + Lab Instructor (CAD/CAM, conceptual physics), 2005–2009 · MBNA America — LAN Technician, Credit Analyst, Customer Assistance, 1999–2003 · Wight Consulting Engineers — Field Inspector → VP Field Construction (municipal water/sewer/roads), 1990–1995 · USMC — AV-8B Harrier Hydraulics, MAG-32 + VMAT-203, Cherry Point NC, 1986–1990

SELECTED PROJECTS

- healthcare-data-training** (private repo) — market research + curriculum + GTM for non-technical healthcare workers using Claude Code, Codex, and Cursor to build data tools. 7 personas, 43-course landscape teardown, 6-module curriculum spec (1,402 lines), 3,000-line GTM plan.
- Substack** williamrthomas.substack.com — “14 Rules for Solo Builders in the Age of AI” · “Why AI Slop Creates Unprecedented Developer Demand” · “Can AI Make Us More Human?” · “DNA Datascape & Origami Hard Drives”

SKILLS

LLMs / Agents: Claude (primary build partner), Codex, MCP-shaped patterns, prompt eng, eval frameworks, llm_traces observability, mixed-model routing, embeddings/vector search, agentic dev workflows.

Languages / Data / Apps: Python (primary), TypeScript · Snowflake, DuckDB, Parquet, Salesforce, Oracle, semantic modeling, data contracts · React, FastAPI, Astro, geospatial.

Healthcare: ACO, value-based care, Population Health, HPDE, Moment of Care, claims/EHR-adjacent. **Education:** Maine Teaching Certificate (2007) · USMC AV-8B Harrier Hydraulics 1986–87 · McHenry East Campus HS 1986.
